Air-Pro™ Compressed Air Piping System

The Air-Pro™ piping system is specifically constructed for compressed air. It has been extensively tested for safe operation in compressed air applications. Air-Pro™ offers a safe, reliable system with the many advantages of thermoplastic construction.

These include convenient light weight, faster/lower cost/ more flexible installation, minimal system pressure drop, and corrosion resistance. Air-Pro™ has been tested to meet the requirements of California OSHA for thermoplastics in compressed gas applications.
